FEATURING

- Limited Lifetime Shingle Warranty
- 15-year Right Start™ Warranty

DISCLAIMER: Sample pieces or photographs of shingles may not accurately represent the true color or variations of color blends that will appear on the roof. Before installation, five or six shingles should be laid out and reviewed for conformity to desired color level. If color levels are unsatisfactory, advise your dealer before proceeding with installation. Colors and specifications subject to change without notice. Limited warranties carry terms and conditions. Contact your local Malarkey representative for further information. See Malarkey Shingle Warranty for details.

δ For complete Limited Lifetime Warranty details, reference Malarkey's Limited Lifetime Shingle Warranty.
 * Malarkey Roofing systems require algae resistant EZ-Ridge™, EZ-Ridge™ XT or Hip and Ridge shingles 10" & 12", in conjunction with the algae resistant shingles, to receive the full 20-year algae resistant system warranty. The Alaskan® featuring Scotchgard™ Algae Resistant Protection from 3M can be substituted as hip and ridge shingles, in conjunction with the algae resistant shingles, to receive the full 20-year algae resistant system warranty. 3M and Scotchgard are trademarks of 3M Company.

** Some contractors adapt roofing shingles for use as a hip and ridge shingle. If your contractor uses this method, the Enhanced Wind Warranty will apply when The Alaskan® is used as hip and ridge shingles. Use of Dura-Seal™ shingles for hip and ridge will not qualify toward Enhanced Wind Warranty.

This version supersedes all previous versions. Rev. 5/14

WINDSOR™

ELEGANT HEAVYWEIGHT SHINGLE

SCOTCHGARD™ PROTECTION FROM 3M

Regions that are prone to algae growth should inquire about our Windsor™ shingles featuring Scotchgard™ protection from 3M. Windsor™ shingles, featuring the 20-year Scotchgard™ Algae Resistant Roofing System warranty from 3M, are equipped with the most effective solution available against algae staining.

EXTREME WEATHER PROTECTION

The Windsor™ provides a durable barrier against extreme weather, receiving the ULL 2218 Class 4 Impact Resistance classification, the highest rating possible.

In a Class 4 rating test, the Windsor™ withstood a simulation of hailstones impacting a roof at 90 mph (144 kph) without sustaining damage.

RUGGED DURABILITY

Malarkey's revolutionary Windsor™ shingle technology begins with a durable base layer of fiberglass mat. Malarkey's unique fiberglass mat is coated on both sides with the SBS enhanced asphalt, which provides tensile strength and increased flexibility, protecting your investment.

SBS MODIFIED ASPHALT

The rubberizing aspect of SBS increases flexibility and weatherability for your roof. The thermo cycling resilience of SBS modified asphalt provides greater granule adhesion for the shingle to create a better barrier from the elements. When granules stay on the shingles, your roof lasts longer.

RAIN SEAL PROTECTION

Malarkey's Windsor™ shingle is manufactured with SEBS asphalt in the critical area for a heavyweight shingle. The SEBS asphalt has elongation capabilities up to 800 percent and is flexible down to 0°F (-18°C). The rain seal remains intact through the freeze and thaw cycle.

COLD WEATHER FLEXIBILITY

The properties found in SBS enhanced asphalt allow for cold weather installation down to 0°F (-18°C), which is 40 degrees lower than standard asphalt. This cold weather flexibility allows the shingle to conform to a variety of roof structures and withstand extreme weather cycles.

LIMITED WIND WARRANTY

Windsor™ shingles come with a 110 mph (177 kph) Limited Wind Warranty.

ENHANCED WIND WARRANTY

Windsor™ shingles are eligible for a 140 mph (225 kph) Enhanced Wind Warranty when Malarkey's Smart Start™ shingle is installed, shingles are nine nailed, and one or more of Malarkey's supporting products – Arctic Seal®, Right Start™ UIDL, SecureStart™, EZ-Ridge™ (8", 10") or Hip & Ridge Strips (10", 12") – are used.

TEST COMPLIANCE

- ASTM D7158 Class H
- ASTM D3161 Class F
- ASTM E108 Class A
- CSA A123.5
- ASTM D3462
- ASTM D3018 Type I
- ULL 2218 Class 4
